Data sources

We checked 1000+ data sources in **48 countries**

Commercial use check

We checked if this vehicle was used for commercial purposes - like a taxi, rental, or another service vehicle. These vehicles often see heavier use, so it's worth looking closer for signs of wear.

No issues found

No records of vehicle being used in irregular manner

Here's what we checked:

Taxi

No evidence of being used as a taxi

Transport

No evidence of being used as a transport vehicle

Rental

No evidence of being used as a rental

Police

No evidence of being used by police

Demo

No evidence of being used as a demo vehicle

Mileage

We checked if the mileage looks accurate or if it may have been tampered with.

Summary

- Last known mileage: 163,000 km
- Average mileage for similar models: 145,433 km
- 4 mileage records found

Driving habits

See how intensely this car was driven over time. Lighter use usually means less wear, while intense driving may lead to faster wear on key parts.

Limited driving < 600 km/month 0% of analyzed period

Driven less than typical. Limited use can sometimes lead to aging of unused parts.

Normal driving 600 - 2,400 km/month 65% of analyzed period

A typical driving pattern. Often means steady use and balanced wear.

Intense driving > 2,400 km/month 35% of analyzed period

Driven much more than typical. Often means parts have to work harder and may need to be replaced.

No driving 0% of analyzed period

A break in use for an extended period. Cars with long periods of no use may need extra checks (battery, brakes, tires).

Damage

Has this vehicle been damaged in the past? What was the value of the damages?

No issues found

No damage or assessment records found

No damage found

Occasional inaccuracies can occur, especially when checking older vehicles. Underground repair shops may illegally disguise vehicle defects or damages, not recording their existence anywhere. Sometimes, even vehicle VIN plates may be replaced. We have a variety of methods to detect even such crimes, but it's impossible to provide a 100% guarantee.

Market price

We checked how this vehicle's market price has changed over time, based on available historical data and price estimates.

The timeline shows a limited period and does not reflect the vehicle's full lifetime pricing.

Criteria for market price evaluation:

Make: **Volvo**

Model: **XC90**

Transmission type: **Automatic**

Year: **2019**

Market: **Europe**

Market price insights

Price trend forecast

This vehicle is expected to lose -68% of its market price over the next 7 years.

Price drop & buying window

The largest drop in market price is expected around 2031, when the vehicle reaches 12 years of age. Buying around this time may offer better value.

Optimal selling timing

Selling before the largest price drop – expected around 2030 or 11 years of age – may help retain more value.

Selling time

Similar vehicles typically sell within 30 days based on recent market data

Note: Forecasts are based on current market trends and historical data. Actual resale value may change due to market shifts, condition, location, or other factors.

Helpful tips after reading the report

Every tip you check off helps you avoid unwelcome surprises later. The more you check, the safer your car deal.

Do these checks before buying a car:

☐

Get a professional inspection

An expert mechanic can spot hidden issues you might miss. Here's what to do next:

☐

Book a pre-purchase inspection at an independent or authorised service

☐

Ask the mechanic to check key systems: engine, brakes, suspension, electronics

☐

Request written notes or a report of any issues found

☐

Ask for service records

Service records show how well the car has been looked after. Here's what to do next:

☐

Ask the seller for the car's service book or maintenance records

☐

Check for regular oil changes, filter replacements, and timing belt work

☐

Note any missing or overdue services

☐

Check if the mileage matches

Make sure the mileage in this report matches the car's odometer readings. Here's what to do next:

☐

Check the odometer reading against the mileage in the report

☐

Watch for signs of tampering (worn pedals, suspicious dashboard fixes)

☐

Ask the seller about any differences

☐

Take a real test drive

A proper test drive helps you spot problems with performance, handling, or comfort – you'll notice much more on the road than you will in the parking lot. Here's what to do next:

☐

Drive on different road types: highway, city traffic, and bumpy or uneven surfaces

☐

Listen for strange noises or vibrations

☐

Pay attention to handling and comfort

☐

Compare with similar cars

Checking other listings helps you know if the asking price is fair – or worth negotiating. Here's what to do next:

☐

Search for similar cars online (same make, model, year, mileage)

☐

Compare asking prices

☐

Look at car condition and equipment

☐

Use this info to negotiate with the seller
